empowerment

Our Community Treatment Center offers unique programs for men who have recently been released from prison, or who have been referred locally by their supervising parole or probation officer.

In-house programming focuses on anger management, cognitive behavior, computer training, and parenting skills. Residents are assisted in securing employment; and many are required to participate in our substance abuse education & treatment programs. Electronic Monitoring Services are also available.

Through innovative individualized case management, we've helped thousands of men secure employment, re-build relationships with their families, and learn to live sober, all of which contribute to a successful re-entry into their local community.

#### **Restorative Justice**

The Community Treatment Center works to coordinate activities that encourage ex-offenders to participate in community service.

#### **Returning Home**

The Returning Home program is a cooperative effort between Volunteers of America Northwest Ohio, the Corporation for Supportive Housing, and the Ohio Department of Rehabilitation and Corrections. The population served by this program is persons leaving prison who have been identified as homelessness or at risk with a disability such as mental illness, alcohol/chemical dependency, physical disability, and/or have experienced chronic unemployment.

Housing is provided in scattered site apartments and supportive services are provided by Volunteers of America Northwest Ohio staff.

The Bureau of Community Sanctions initiates referrals.
